

Airline Safety:

The Noise, The Facts, Your Decision

*A multitude of airlines provide quick, affordable and convenient transportation for millions of passengers each year. Although these airlines have many differences, they do have one thing in common: **Their safety records are vastly superior to other forms of transportation.***

Air travel is 137 times safer than automobile travel.

From 2000 to 2015, automobiles were responsible for 428,423 fatalities compared to 3,109 for air travel.

Why the bad press?

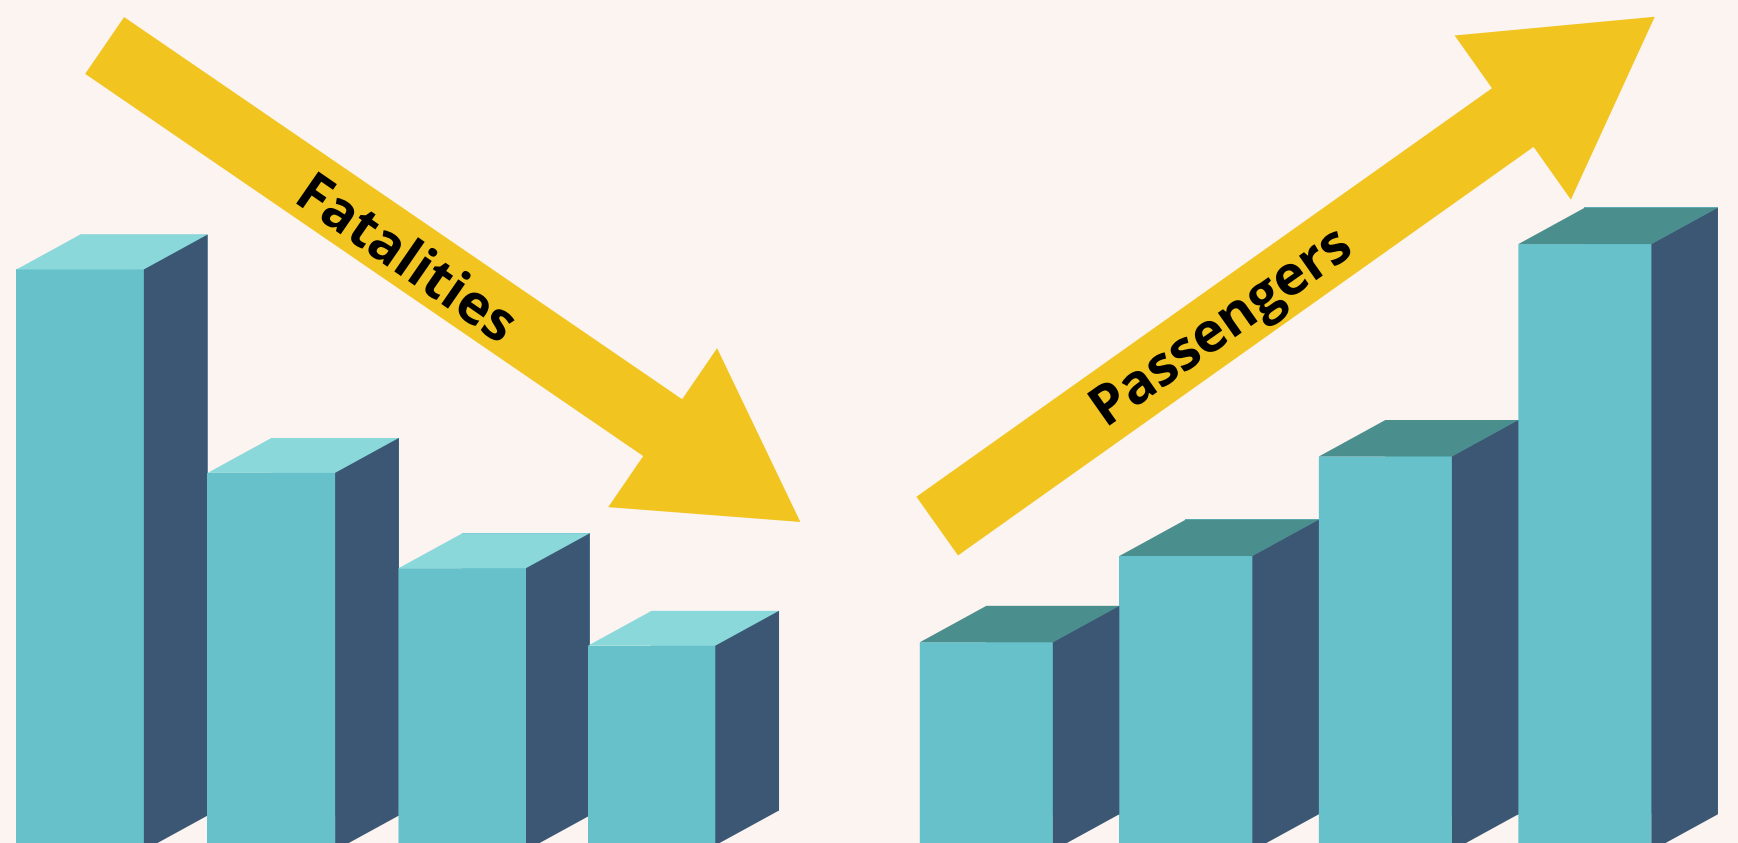

Recent negative press is generated by foreign carriers with fatality rates **5 to 10 times higher** than North American carriers.

Foreign carriers have different safety cultures and less rigorous governmental oversight.

Continuous Improvement Culture!

Over the past 5 decades fatalities have been cut to **25%** of 1968 levels while passenger loads have increased **tenfold**.

Economic Impact

North American airlines increase tourism by **\$896Bn** annually and has an **\$704Bn** impact on GDP annually.

Additionally, it drives **7.6MM** jobs across every state.

You Decide

Air travel is safe, convenient and important to the economy. It saves **billions** travel of hours every year.

Now that you know the facts, you can confidently make travel decisions that are best for you and your family.
